H.R. 3962, the Affordable Health Care For America Act eliminates hundreds of billions of dollars of waste and fraud in medicare as well as incorporating increased payment accuracy and eliminating overpayments. It uses those savings to;

- Increase payments to primary care physicians
- Eliminate the donut hole
- Extend key protections for rural providers
- Improve access to mental health services
- Eliminate co pays and deductibles for preventative services including mammograms and cancer screenings
- Extend Medicare's solvency by 5 years or more
- Fix rural payment disparities that hurt Oregonians by revising the payment rates in Medicare for "low cost, high quality " states like Oregon.
